Program No: 01	Date: 23/07/2025

Program Title : Write programs to demonstrate the use of storage classes (local variable, global variable, static variable, register variable) in C.

```
/*Program 1 USE DIFFERENT STORAGE CLASSES (LOCAL,GLOBAL,STATIC,REGISTER)
@ALBIN MAMMEN MATHEW
Roll No: 08
Date: 23/07/2025
*/

#include <stdio.h>
int a=10;          //intialising global variable
void disp(){
        int i=3; //intialising local variable
        printf("this is a local variable : %d \n",i);
}
int main(){
        static int c;//intialising static varible
        register int p=4; //intialising register variable
        printf("this is a static variable : %d \n",c);
        printf("this is a global variable : %d \n",a);
        printf("this is a register variable : %d \n",p);
        disp();
        return 0;
}
```

Output Screenshot/Text

```
this is a static variable : 0
this is a global variable : 10
this is a register variable : 4
this is a local variable : 3
```

Program No: 02	Date: 23/07/2025

Program Title : Use a menu-driven program to insert, search, delete and sort elements in an array using functions (use global variables).

```
/*PROGRAM-2 A MENU FOR ARRAY OPERATIONS(INSERT,DELETE,DISPLAY,SEARCH,SORT)
USING GLOBAL VARIABLE
@ALBIN MAMMEN MATHEW
Roll No: 08
Date: 23/07/2025
*/
